Cassell's Spanish Dictionary

"A really valuable work of scholarship. This is a dictionary of distinction which may be enthusiastically recommended."

—THE TIMES EDUCATIONAL SUPPLEMENT

Compiled by a team of experts headed by the late Professor Edgar Allison Peers, Gilmour Professor of Spanish at the University of Liverpool, Founder and Director of the Bulletin of Hispanic Studies, and Educational Director of the Hispanic Council, this dictionary provides not only the Castilian and regional dialects of Spain but the local usages of the different nations of South and Central America. As well as classical, literary Spanish it includes current technological, industrial, political and social terms and phraseology.

PREFACE

THE compilation of an entirely new, fully comprehensive dictionary is always a formidable task. In addition to scholarship and an intimate understanding of the living language it demands the unstinting devotion of a team of skilled collaborators for a period of many years. CASSELL'S SPANISH DICTIONARY is the fruit of such an endeavour.

In the course of its preparation the Dictionary has undergone a number of vicissitudes that could not have been foreseen when Edgar Allison Peers, at that time Lecturer at the Institute of Hispanic Studies, first commenced to plan the work some years before the outbreak of World War II. In order to ensure complete copyright protection in America (under Copyright Law as it then existed) it was decided that the text should be set up in the United States, where composition began in the mid-thirties. When war came, all further work on the Dictionary was suspended and the existing material shipped back to Great Britain—surviving the perils of submarine attack only to fall victim two years later to a massive fire-bomb raid on London in 1941, when a large part of the manuscript was irretrievably lost in the total destruction of 'La Belle Sauvage,' Cassell's headquarters since 1851.

When, after the war, the work of compilation was resumed, much of it had to be begun again almost from scratch. By this time E. A. Peers' increasing academic commitments as visiting lecturer and professor in Madrid, Oxford, and New York, and professor in Liverpool, had made it necessary for him to withdraw from active participation, although, until his untimely death in 1952, his valuable advice remained at the disposal of those who carried on the task—Mr. J. V. Barragán, Mrs. Rose Barragán and, later, Mr. F. A. Vinyals who gave much time and thought to bringing the whole text completely up to date. The publishers were especially fortunate in being able to enlist the aid, also, of Mr. J. A. Mora, whose wide knowledge of South and Central American usage has been responsible for the inclusion in the Spanish-English section of terms and idioms peculiar to Spanish America—one of the Dictionary's most important features. Finally, the whole work was revised and enlarged by Mr. R. O. Jones and Mr. J. W. Sage.

A dictionary of this size must of necessity be highly selective. We believe, however, that the present work will be found adequate for the reading of both the Classics and standard modern literature in English and Spanish (many archaisms have been included with this purpose in mind); for the comprehension of current colloquialisms in both languages; and for a wide range of modern technical usage. Its strength in Spanish-American terms has already been referred to. In short, our aim has been to provide a dictionary which, though compendious, could be of service to student, business man and general reader alike.

ADVICE TO THE USER

GROUPING OF WORDS. Alphabetical order has been generally adopted, but where it was thought clearer or more convenient compounds were grouped under key-words. Key-words which are spelt alike, but which differ in origin and meaning, are given separate entries where that seems necessary to avoid gross confusion.

PUNCTUATION. In principle, synonyms or near-synonyms are separated by commas, and wider differences of meaning indicated by semicolons. In practice a clear distinction is impossible to observe and some apparent inconsistency is inevitable. Where clear demarcation in meaning or usage can be established, the semicolon is used; otherwise a comma is preferred.

GENDER. In the English-Spanish section the gender of Spanish nouns is given only when it does not obey a simple rule which is given separately (see p. xiv).

ADVERBS. English adverbial forms ending in '-ly' have generally been omitted except when there is some special feature in their Spanish equivalents.

USE OF BRACKETS. Brackets are used in various ways:

(1) They enclose words or parts of words which may be omitted or included without changing the sense.

(2) When a word or phrase enclosed in brackets in one language is followed by a word or phrase in brackets in the other language, the contents of the one bracket are to be understood as translating the contents of the other.

(3) In order to indicate the range of usage of a word with the help of the appropriate abbreviation in italics or in some other way. Thus, (*aer.*) limits the word to an aeronautical, and (*igl.*) to an ecclesiastical context. In an attempt to give some guidance in distinguishing between other uses, a hint has often been given by a word in brackets in roman type where no appropriate abbreviation existed. For example, under **distinction** one of the equivalents is given as '(examen) sobresaliente', to indicate the term used in examinations.

(4) In order to indicate the stratum of language to which a word belongs. Here there are not always clear dividing lines, but the following are some of the distinctions borne in mind:

(i) (*obs.*) or (*ant.*): the Dictionary includes a large number of archaic and obsolete terms. Many archaic terms survive in, for example, legal use, but we have set our bounds wider than this. A Spanish student of English will wish to possess a dictionary that will cover adequately the vocabulary of Shakespeare, Milton and Scott.

(ii) (*poet.*): here most of the foregoing applies with equal force. The indication should be taken as a warning that the form is no longer part of the living language.

(iii) (*coll.*) and (*fam.*) indicate language which would not be used in dignified prose or even in conversation with respected strangers. It would be normal in polite conversation with one's equals.

(iv) (*vulg.*) indicates language which is considered embarrassing in polite conversation. It is not synonymous with obscenity. So far as possible renderings have been chosen from the same layer of language, though this is often difficult, but sometimes it was considered necessary to avoid ambiguity by giving a more conventional equivalent as well.

(v) (*Am.*) and more specific references to particular Latin-American countries indicates usage peculiar to those areas. This Dictionary carries an unusually high proportion of Spanish-American vocabulary and this is, we believe, one of the most important features of the work.

PRONUNCIATION. In the English-Spanish section the International Phonetic Alphabet is used to indicate pronunciation. The stress mark precedes the syllable which carries the stress. Since Spanish already is an approximation to a phonetic transcription, pronunciation has not been indicated in the Spanish-English section, though some simple rules for the English user are given. In both sections the 'standard' pronunciation has been used in each case (that is, Castilian and Southern English).

AMERICAN ENGLISH. Where English and American usage differ, dictionaries tend to be unjust to one or the other. This Dictionary attempts to do justice to both. Differences of spelling (*pyjama* and *pajama*), of meaning (the two senses of *truck*) and of terminology (*elevator* and *lift*) are catered for and clearly distinguished.

NOTE ON SPANISH GENDER

Nouns ending in *-a*, *-ción*, *-gión*, *-sión*, *-tión*, *-xión*, *-umbre*, *-dad*, *-tad*, *-tud*, *-ez*, are feminine. Nouns with other terminations are masculine. (Exceptions to these rules are noted in the body of the dictionary.)

In a few cases, even where these rules apply, the gender has been indicated when doubt might arise: e.g. *tiralíneas*, *m*.

KEY TO PRONUNCIATION

The English equivalents of the sounds of the Spanish language, given below, are only approximations, but they will aid the user in acquiring a reasonably satisfactory pronunciation of Spanish. Those who wish to make a more thorough study are referred to *Manual de pronunciación española* by Navarro Tomás (Hafner Publ. Co., New York, 1957).

VOWELS

In Spanish it is very important to pronounce the vowels clearly and distinctly. They always have the same sound, whether stressed or unstressed. There are two tendencies, common in English, that should be carefully avoided in Spanish pronunciation: (1) the dropping or slurring of an unstressed vowel (*p'lite* *vs.* *polite*), and (2) the glide sound commonly found in such English words as *there* (frequently pronounced *they-er*) or *more* (frequently pronounced *mow-er*).

The Spanish vowels are: **a**, **e**, **i**, **o**, **u**, and occasionally **y**.

- a** is pronounced like the *a* in English *bab*, *father*.
Spanish examples: **la** (the); **da** (give)
- e** has two sounds: (1) in an open syllable (i.e. a syllable not closed by a consonant) it is pronounced like the first *a* in *fatality*.
Spanish examples: **me-sa** (table); **pa-dre** (father)
(2) in a syllable closed by a consonant, it is pronounced like the *e* in *let*, *met*, or *set*.
Spanish examples: **em-bar-go** (embargo); **pa-pel** (paper)
- i** pronounced like the *i* in *machine*.
Spanish examples: **vi-no** (wine); **des-ti-no** (destiny)
- o** has two sounds: (1) in an open syllable (i.e. a syllable not closed by a consonant) it is pronounced like the *o* in *halo*.
Spanish examples: **pe-so** (weight); **so-lo** (alone)
(2) in a syllable closed by a consonant, it is pronounced like *o* in *storm*.
Spanish examples: **me-nor** (less); **tor-men-ta** (storm)
- u** pronounced like the *oo* in *boot*.
Spanish examples: **lu-na** (moon); **mu-cho** (much)
- y** is a vowel only when it stands alone, or when it ends a word. In these cases it has the same sound as the Spanish *i* (See *i* above).
Spanish examples: **y** (and); **hay** (there is, there are); **soy** (I am)

CONSONANTS

- b, v** These letters are identical in sound, but vary in pronunciation according to their position: (1) after a pause or after the consonants **m** or **n**, they are pronounced exactly like English *b*.

Spanish examples: **ban-di-do** (bandit); **em-bar-go** (embargo); **en va-no** (in vain)
(2) in all other positions, both **b** and **v** have approximately the same sound as the English *v* in *give* (i.e. they are pronounced between the lips without a complete contact of the lips).

Spanish examples: **ha-blar** (to speak); **pa-vo** (turkey)

- c** has three sounds: (1) before a, o, and u, and at the end of a syllable or a word, it has the sound of English *k*.
Spanish examples: ca-sa (house); co-sa (thing); cu-na (cradle); ac-to (act); cinc (zinc)
- (2) in standard Castilian pronunciation, c before e and i is pronounced like *th* in English *thin*.
Spanish examples: ce-na (supper); cin-ta (ribbon, tape)
- (3) in parts of southern Spain and in Latin America, c before e and i is pronounced like English *s* in *say*.
- ch** is treated (and alphabetized) as a single consonant. It is pronounced like the *ch* in *church*.
Spanish examples: chin-che (bedbug); mu-cha-cha (girl)
- d** has two distinct sounds: (1) after a pause, and after n and l, the pronunciation is similar to the *d* in *dog*.
Spanish examples: ¿Dón-de? (Where?); fal-da (skirt)
- (2) between vowels and at the end of a word, the pronunciation is similar to the *th* in *though*.
Spanish examples: la-do (side); mi-tad (half)
- f** similar to the English *f*, except that the Spanish *f* is formed by the two lips, rather than by lip and teeth.
Spanish examples: fi-no (fine); fa-vor (favor)
- g** has two sounds: (1) before a, o, and u, and before a consonant, it is pronounced like the *g* in *go*.
Spanish examples: ga-to (cat); go-ta (drop); gus-to (taste); mag-ní-fi-co (magnificent)
- (2) before e and i, g has no equivalent sound in English. The closest approximation is that of the *ch* in the Scottish *loch* (Loch Lomond) or the German *Bach* (Johann Sebastian Bach).
Spanish examples: gen-te (people); gi-gan-te (giant)
- NOTE: In the combinations gue and gui, the u is not pronounced and the g has the sound of the *g* in English *go*. (Examples: gue-rra [war]; gui-ta-rra [guitar].) However, if the u carries a dieresis (ü), it is pronounced like the English *w*. (Examples: a-güe-ro [omen]; güi-ro [gourd].)
- h** is never sounded in Spanish.
Spanish example: ho-ra (hour) is pronounced as if it were spelled "ora."
- j** has the same sound as g before e and i (See g above)
Spanish examples: je-fe (chief); hi-jo (son)
- k** has the same sound as in English.
Spanish example: ki-lo-gra-ma (kilogram)
- l** pronounced approximately as the *l* in *limp*.
Spanish examples: lu-na (moon); ma-lo (bad)
- ll** is treated (and alphabetized) as a single consonant. The sound in Castilian is very much like the English *lli* in *billiard*. In parts of southern Spain and in Latin America ll is pronounced like the English *y* in *yet*.
Spanish examples: vi-lla (town); lla-ve (key)
- m** has the same sound as in English.
Spanish example: mu-cho (much)
- n** has three sounds in Spanish: (1) approximately like the *n* in *normal*.
Spanish examples: nú-me-ro (number); can-to (chant)

- (2) before **b** or **v**, it is pronounced like the English *m*.
 Spanish examples: **en** bo-ga (in style); **in-vi-tar** (to invite)
- (3) before hard **c** and **g**, it is similar to the *ng* in *wringer*.
 Spanish examples: **fran-co** (frank); **len-gua** (tongue)

ñ is pronounced like the *ny* in *canyon*.

Spanish example: **ma-ña-na** (tomorrow)

p is similar to English *p*, but without the explosive sound.

Spanish examples: **pa-tio** (courtyard); **ma-pa** (map)

NOTE: the **p** is silent in two Spanish words—**sép-ti-mo** (seventh) and **sep-tiem-bre** (September).

q occurs only in the combinations **que-** and **qui-** and is pronounced like English *k* (the *u* is silent).

Spanish examples: **que-so** (cheese); **quin-to** (fifth)

r after a pause, and when preceded by **l**, **n**, or **s**, this letter is strongly trilled.

Spanish examples: **al-re-de-do-res** (environs); **hon-ra** (honor); **is-ra-e-li** (Israeli)

In all other positions, it is pronounced with one tap of the tongue against the sockets of the upper front teeth.

Spanish examples: **pe-ro** (but); **can-tar** (to sing)

rr is treated (and alphabetized) as a single consonant. It is strongly trilled, in much the same manner as the Scottish *r* is trilled.

Spanish examples: **pe-rro** (dog); **ca-rro** (cart)

s has two sounds: (1) in general it is pronounced like the *s* in *case*.

Spanish examples: **so-lo** (alone); **ca-sa** (house)

(2) before **b**, **d**, **g**, **l**, **m**, and **n**, it is pronounced like the *z* in *baze*.

Spanish examples: **es-bo-zar** (to sketch); **des-de** (since)

tras-go (goblin); **is-la** (island)

fan-tas-ma (phantom); **fres-no** (ash tree)

t similar to the English *t*, but without the explosive sound.

Spanish examples: **tan-go** (a dance); **pa-to** (duck)

v See under letter **b** above.

w This letter does not belong to the Spanish alphabet and is found only in foreign words. See the letter *W* in the Spanish-English section of this dictionary.

x The usual sound of Spanish **x** is somewhere between the *x* in *axe* and the sound of the *x* in *exaggerate*.

Spanish examples: **e-xa-mi-nar** (examine); **bo-xe-ar** (to box)

However, in the prefix **ex** followed by a consonant, the **x** is generally pronounced like the *s* in *casé*.

Spanish example: **ex-pli-car** (to explain)

NOTE: In the word **México** and its derivatives, the **x** is pronounced like the Spanish **j**.

y For the pronunciation of the letter **y** as a vowel, see the letter **y** above under the heading of *Vowels*.

As a consonant, **y** before a vowel is pronounced like the *y* in *yet*.

Spanish examples: **yo** (I); **yu-go** (yoke)

z In Castilian, **z** is pronounced like the *th* in *thin*. But in parts of southern Spain and in Latin America, the **z** is pronounced like the *s* in *case*.

Spanish examples: **ca-zar** (to hunt); **zo-na** (zone)

CASSELL'S
SPANISH-ENGLISH DICTIONARY

CASSELL'S

SPANISH-ENGLISH DICTIONARY

A

A, a, n.f. first letter of the alphabet; pronounced invariably as the open English *a* in *far*. *No sabe ni la a*, he is a perfect ignoramus; *a por a y be por be*, point by point, minutely.

a, prep. to, at, on, by, in, up to, according to, as, as if, for, against, with, toward, up on, until, of, after, etc. It governs the dative and accusative cases: *lo doy a mi padre*, I give it to my father. Before proper nouns, personified nouns and occasionally before other nouns, in the accusative case, *a* is a symbol of that case and is not translated: *veo a mi madre*, I see my mother; *conozco a Juan*, I know John. It indicates direction, purpose, limit, approval, interval, action, location, rate or quantity, request, time, distance, command, manner, instrument or means, e.g.: *voy a París*, I am going to Paris; *ella me enseñó a cantar*, she taught me (how) to sing; *voy a verle*, I am going to see him; *de tres a cuatro*, from three to four; *de mes a mes*, from month to month; *de casa a casa*, from house to house; *a mi gusto*, to my taste; *a mi pesar*, to my regret; *con el agua a la cintura*, with water up to the waist; *a la orilla del río*, on the bank of the river; *a mi lado*, at my side; *el azúcar se vende a tres pesos el quintal*, sugar is sold at three dollars per hundredweight; *hacer el seguro a tres por ciento*, to effect the insurance at three per cent; *a instancias de mi hermano*, at my brother's request; *a mediodía*, at midday; *a la española*, in or after the Spanish fashion; *morir a hierro*, to die by the sword; *oler a vino*, to smell of wine; *a su disposición*, at your disposal; *a voluntad*, at will; *a manos llenas*, liberally, by handfuls; *a mano*, by hand; *a máquina*, by machine; *a fuerza bruta*, by brute force; *a pedazos*, by pieces; *paso a paso*, step by step; *poco a poco*, little by little; *a caballo*, on horseback; *a pie*, on foot; *a bordo*, on board, aboard; *a mi fe*, upon my honour. It forms many idiomatic and adverbial phrases: *a mi llegada*, on my arrival; *a oscuras*, in the dark; *a lo que parece*, as it seems; *a sabiendas*, on purpose, deliberately; *a trueque*, in exchange; *a deshora*, unseasonably; *a la verdad*, truly; *a lo menos*, at least; *a ojos vistos*, plainly, publicly; *a veces*, sometimes; *a pesar de*, in spite of. When followed by an infinitive, it represents: if, if . . . not, but for: e.g.: *a ser yo*, if I were; *a mal dar*, if it should turn out badly; *a no haber sido*, if it had not been; *a no ser zahorí*, but for his being a wizard; *a no venir José*, but for Joseph's coming; *a no ser por Vd.*, but for you. It coalesces with the article *el*, forming *al*; *al hombre*, to the man; *traducir al inglés*, translate into English. This masculine article is also used before the infinitive of verbs used as nouns: *al entrar*, on entering. It is used before the infinitive of verbs of

action governed by other verbs: *vamos a pasear*, *a comer*, *a beber*, let us go for a walk, (let us) eat, (let us) drink.

a-, pref. denotes privation or negation as, *acromático*, achromatic; *ateísmo*, atheism; *amoral*, amoral.

A., contraction for *Alteza*, Highness; (*com.*) on a bill of exchange signifies 'accepted'; (*naut.*) on the anchor of a ship, 'insured'; 'approved' (on examination papers).
